

Preston-Werner Ventures Commitment

Narrative:

We are a small US family foundation with an interest in ensuring that no one is denied access to sexuality education and voluntary contraception. We commit to providing USD 1 million per year over the period of 2022-2025 towards the global goal of universal access to sexual and reproductive health and rights by 2030. As our interest is also climate change, we will work with women leaders to include SRHR in climate and emergency preparedness conversations.

Outcomes:

In 2022-2025, we will invest \$3 million to support NGOs that work on advocacy and systems strengthening to deliver sexual and reproductive health and rights information and services to under-served and vulnerable populations. We will contribute funding to advocacy efforts to incorporate FP into national and sub-national health plans and budgets in several countries in East Africa and Southeast Asia.
