

Fundación Economía Nacional Agraria de Colombia - ENAC

Narrative:

The Enac Foundation seeks social development in all its aspects, focusing mainly on rural areas. In Colombia, Comprehensive Sexuality Education remains a challenge, since it is not included in the curriculum in educational institutions. Potosí is a clear example of this. It is a municipality clinging to Catholic traditions in which sexuality in all its forms remains a taboo. That is why, from the Gender Committee, under the project Spinning Stories for an Emancipated Sexuality, at Enac we seek to create dialogical and artistic spaces that have gender equality and sexual and reproductive rights as their central theme. In this way, by 2025 we hope to have created alliances with different grassroots organizations at the national level, institutions and the community, to give continuity to this initiative. Likewise, through festivals, talks and training circles with the methodology of popular education, an average of 300 people in our municipality will have benefited.

Objectives:

- Training workshops held for young people from the municipality of Potosí, Nariño on project formulation and sexual and reproductive rights and the third version of the Festival Música, Territorio y Ruralidad Femenina was carried out with its respective training in terms of gender equality, reaching 300 people from Potosí.
- First version of the Weaving and Herbalism Laboratory created: Sentipensando mi ciclo menstrual.
